MEMORANDUM FOR: Executive Director

85-1344

VIA: Deputy Director for Administration

FROM:
Director of Security

STAT

SUBJECT: Industrial Security Seminar
2 - 3 June 1983

1. The Office of Security is hosting an Industrial Security Seminar at Headquarters on 2 and 3 June 1983. This is the fourth such conference the Office of Security has sponsored and, as before, the attendees will be corporate security officers representing firms with significant contractual relationships to the Agency. On this occasion there will be 32 attendees from approximately 20 firms that have contracts sponsored by the Office of Logistics. The agenda includes both general sessions and workshops. The general sessions will be held in Room 1A-07, Headquarters, on both days. Others in attendance will include our industrial security auditors and security officers assigned to the Office of Logistics Security Staff.

2. You are invited to speak to the group at the opening session on Thursday, 2 June 1983 from 1045 to 1115 hours. We believe that it is very important to the success of this program to have the appearance of a senior Agency official as an expression of the interest and concern that we have for our industrial relationships. This has been a highlight of past seminars and we assure you that an appearance on your part will be well received. Please be in touch with the undersigned on any aspect of this you would like to discuss. STAT

3. Attached are copies of the seminar schedule (Tab A); the expected attendees (Tab B); and some "bullets" you apparently found useful for your last appearance before a similar group (Tab C).

4. The Industrial Security Seminar agenda includes a social gathering in the Executive Dining Room from 1730 to 1930 hours on Thursday, 2 June. You are cordially invited to attend as a guest of the undersigned.

TOPICS OR THEMES - INDUSTRIAL SECURITY SEMINAR

- Considerable progress has been made in the six years since attention was focused on industrial security as a consequence of the Boyce/Lee espionage case.
- The Industrial Polygraph Program is a noteworthy accomplishment and is believed to be a significant enhancement to our overall security program.
- The computer processing of Agency-classified data is one of the major security concerns we are faced with today. There are scarcely any contractors that do not use ADP and word processing equipment to accomplish their tasks. Agency management shares this concern and encourages you to actively participate in all facets of the computer security effort.
- The threat remains. Classic espionage efforts have increased alarmingly and with known success. The recent Bell case at Hughes Aircraft Company is a shocking example. Foreign influence, even ownership, of U.S. companies is an increasing problem.
- Most importantly - technology loss - referred to as "hemorrhaging" by Admiral Inman, our former Deputy Director of Central Intelligence, is very much a national problem.
- Problems remain. The difficulties and especially the costs associated with any security program are recognized. Requirements frequently outpace formal regulations and guidelines and new guidelines invariably need to be modified or interpreted. According to the agenda, you will be dealing with several of these problems during this conference.
- Everyone associated with the CIA Industrial Security Program is encouraged by the support and cooperation received from their colleagues in private industry. Nearly 280 security audits of contractor facilities have been conducted during the past six years. We believe that progress has been made, but opportunities remain, particularly in the areas of security education and security awareness.
